Dear Sir,

Hope you are well. I am submitting the assignment about the Johnson's Rule using Python programming language containing a file named (**johnson.py**). I have also attach screenshot of the input and output format. If there is any compilation error in running the python code, please check about the exist of the tabulate module of the python notebook. There may have necessary of installing the tabulate module.

Thanks & Regards,

Solayman Hossain Emon (ID: 16.01.04.091) .
